

ATM DEPOSITS

Do any of our ATM's accept deposits?

Yes, our ATM at the Drive-Through Location currently accepts deposits.

How does the ATM accept the deposit?

The customer inserts the ATM/Debit card to start the transaction. If they have both savings and checking attached to their cards they will be given the option to select which account they want their deposit to go. The customer will then insert the check or currency into the feeder. The ATM reads the bills/check. The customer confirms the amount to be deposited to complete the transaction.

Are the deposited funds available to the customer immediately?

This depends on the amount of the deposit. If a customer's deposit is over \$200.00 only \$200.00 is available until the ATM file is cut and processed. Anything less than \$200.00 is immediately available.

What happens if a Payroll check is deposited in the Drive-Through ATM after 4:00 p.m. on a Friday night?

The customer will only have **access up to \$200.00** of the check if over that amount. The rest of the funds will not be **available until Monday after 4:00 p.m. CST** after electronic processing has occurred.
